

Aistin Owl Development Boards (EPS211 & EPT211)

These two ones are must for real hackers.

You can make your own circuit in top of this empty development board. Aistin Bus24* signals are provided in boards sides. EPT211 is a version with holes and EPS211 is targeted for your own surface mount electronics.

Technical Overview

Aistin Bus24 Host Connectors*

EPT211 free area with holes

EPS211 free area for surface mount parts

All Aistin Bus24* signals in sides
